ASSOCIATE PRODUCT MANAGER INTERN · AI WORKFLOWS FOR US HEALTHCARE

JUL 2026 TO PRESENT · HEALTHCARE AI

Associate Product Manager Intern

500 hrs/wk

saved across 200 users

by owning Status Tracking 0→1: 90k-order SQL analysis, user research, user stories, PRDs (v0 to v1), HLD and dev-testing.

75% / 96%	coverage / precision across 118 payers
92%	accuracy on the Vapi calling MVP
2x	QC throughput on the unified UI
87%	precision on Pulse auto-RCA

200 users save 500 hrs/wk by owning Status Tracking 0→1: 90k-order SQL analysis, user research, user stories, PRDs (v0 to v1), HLD and dev-testing.

118 payers on a live 30-minute sync — docs pulled via portal APIs, bots and a fax API, then categorized and order-matched with a coverage-first trade-off: 75% coverage at 96% precision.

92% accuracy on inquiry calls by building an agentic calling MVP on Vapi from 4 months of data, call checklists and configs; a 20-user pilot sped up testing.

2x QC throughput, 40% faster error fixes — user interviews found QC juggling 4 platforms; prototyped and shipped a unified UI. 2500 orders/day.

87% precision on auto-RCA — built Pulse, a RAG tool-calling auto-RCA tool with chatbot, eval-tested; flags 15 metric drops/day, 60% RCA coverage.

60% fewer filing clicks — launched RISA Assist on the Chrome Store, a low-latency AI extension that parses portal HTML and auto-fills answers.

Saved $10K/yr, 60% step TAT cut — shipped Document Studio on standard APIs to fetch and process clinical docs; replaced Acrobat.

30% time-per-order cut — revamped 4 key order UI steps for edge cases with tech, design and compliance via user research and Amplitude.

S2

InvestMates

PRODUCT MANAGER (PART-TIME) · AI WEALTH MANAGEMENT FOR NRIS

JUL 2025 TO SEPT 2025 · FINTECH

Product Manager (Part-time)

25%

homepage CTR lift

by authoring PRDs for the homepage revamp and AI portfolio health, A/B tested (n=4200, p<0.05).

20%	longer sessions
18%	drop-offs cut by lifecycle campaigns
+3 pp	D7 retention

ALL 2 RESULTS

S3

Suzlon Group

SUMMER INTERN (TEAM LEAD) · RENEWABLE ENERGY

MAY 2025 TO JUL 2025 · RENEWABLE ENERGY

Summer Intern (Team Lead)

66%

reporting time cut

by automating 20 data pipelines with n8n, AI agents and IMAP email parsing.

8-state	CSR analysis led as team lead
20	data pipelines automated

ALL 2 RESULTS

S4

Chimera VC

2 PERSONAL CASE STUDIES
CORPORATE PROJECTS RIGHT BELOW

ASKCART RESEARCH AGENT CORPORATE PROJECTS

AskCart

Guided AI E-Commerce Search and Chatbot

FROM THE MVP

8%
null results, down from 27.3% (n=150)

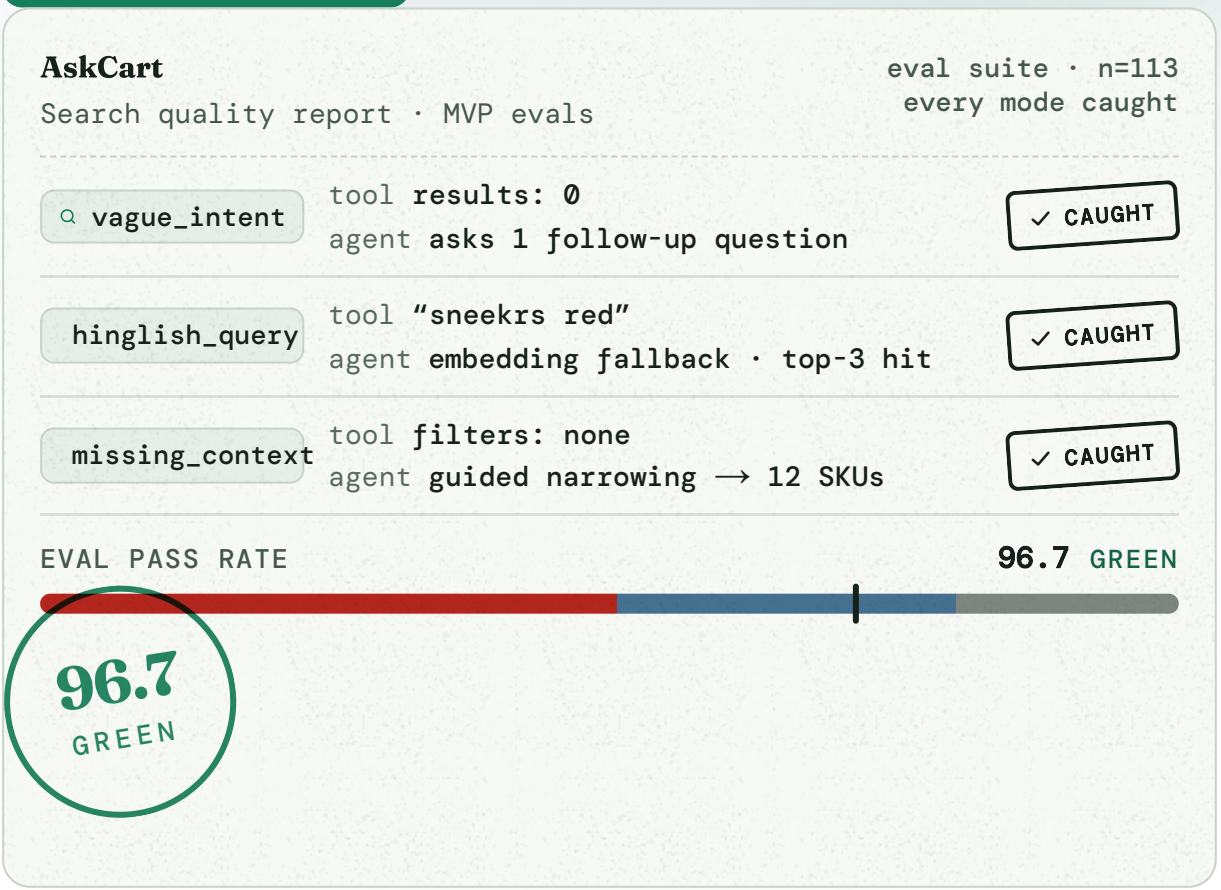

96.7%
RAG eval pass rate (n=113)

78.7%
resolved within 2 follow-ups

E-commerce search fails silently: when the catalog returns nothing, the shopper leaves. AskCart asks one narrow question instead — and the dead end becomes a conversation.

Next.js · SQL · Python · ML · Gemini API

Four ledgers, one method.

SAME FOUR STEPS IN EVERY CARD: ASK A QUESTION, PULL THE DATA, ANALYZE IT, AND LET IT INFORM A DECISION. FIGURES ARE ILLUSTRATIVE SKETCHES OF THE ANALYSIS UNTIL REAL EXPORTS ARE WIRED IN.

QUESTION DATA ANALYSIS RESULT

ILLUSTRATIVE

Mutual Fund Activation & Retention

Synthetic/AMFI investment data • 50K users SYNTHETIC DATA

- Queried investment data via SQL; segmented 50K users by activation stages and constructed detailed 90-day retention cohort views.
- Identified dormant user personas using RFM analysis; proposed re-engagement features backed by cohort-driven insights.

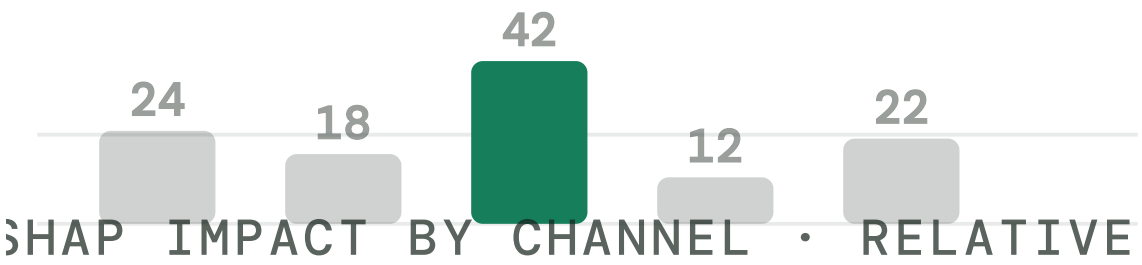

SCALE
50K
users segmented into 90-day retention cohorts

SQL • Python • Excel

ILLUSTRATIVE

Growth Attribution & CAC Optimization

Neobank fintech • 45K campaign records

- Trained XGBoost on 45K neobank campaign records; used SHAP to attribute conversions across 5 digital and direct channels.
- Identified the top acquisition signals per channel; built an AI reallocation model reducing simulated CAC by 28% across the channel mix.

MODELED
−28%

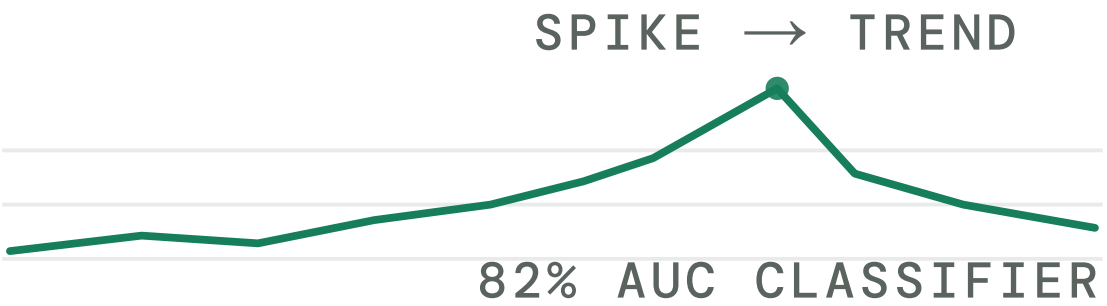

Python · scikit-learn · SHAP · SQL

simulated CAC under AI reallocation of the channel mix

Content Virality Prediction & Segmentation

ILLUSTRATIVE

YouTube Trending dataset · 200K+ videos PUBLIC DATA

- Built NLP features from titles and tags; applied K-means to segment 200K+ videos into archetypes by views and engagement.
- Trained an XGBoost classifier predicting trending content at 82% AUC; surfaced the key drivers for content decisions via SHAP.

RESULT

82% AUC

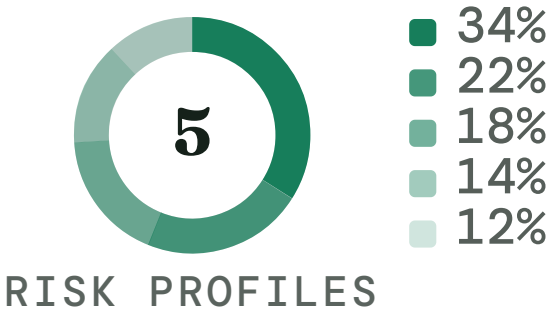

trending-content classifier

SQL · Python · scikit-learn · XGBoost

Loan Risk Segmentation & Default Prediction

ILLUSTRATIVE

LendingClub dataset · 100K+ loan records PUBLIC DATA

- Queried 100K+ loan records via SQL; segmented users into 5 risk profiles using structured RFM-style feature analysis.
- Built a logistic regression model to predict defaults; mapped risk segments to product features and targeted UX interventions.

SCALE

100K+

records segmented into 5 risk profiles

The person behind the work.

Associate Product Manager intern at RISA Labs • AI workflows for US healthcare • Plac

“ The best product decisions come from people, not dashboards.

I studied Electronics and Communication Engineering at BITS Pilani Goa, with a Finance minor. I drifted into product because my questions were never only about the tech — they were also about people, and about money. Now I'm an Associate Product Manager at RISA Labs, shipping AI workflows for US healthcare.

Outside work I lead campus placements at BITS Goa and run a 45-consultant practice at 180 Degrees Consulting.
